

GET YOUR CAREER OFF TO A GOOD START WITH CHAMPIONS

Junior Front-End Web Developer

Location: Costock, near Loughborough, Leicestershire

Hours: Full Time

A leading brand agency, Champions (UK) plc, understand today's fast-paced and ever changing marketplace, using their unique insights and decade of leading market experience to manage and shape the wide array of brands that they work with. The agency begins with a creative process, analysing the consumer sphere and coming up with a concept that is unique to their clients, as well as focusing on the best way to make a real impact to their business by increasing their market share and transforming them into a household name.

The last twelve months have seen Champions (UK) plc recognised on a national level. Their ingenuity and targeted business approach has placed them within The Telegraph 1000 Brightest Businesses, The Sunday Times Fast Track 100, The Recommended Agency Register and The Leicester Mercury's Top 200 Businesses.

Champions (UK) plc have an opportunity for a front-end web developer to join their growing team. The role will involve working at the forefront of the web design industry, involvement with growing the online offering of high profile brands and ensuring that client needs are consistently met.

Summary

The job will require the successful candidate to have at least 1 year professional experience and a portfolio to back this up.

You will be expected to play a significant role in the planning, design and execution of the design of websites, from an aesthetic, but also functional perspective. You'll need to be able to meet with a client and accurately determine what it is they require and then work with project managers to set out the necessary plans to execute the project as part of a team.

Projects will vary, but knowledge in Content Management System (CMS) like Drupal and WordPress are preferred.

Responsibilities

- The ability to produce high and review high quality, clean code and a focus on standards and accessibility
- Supporting existing client with front-end fixes and upgrade
- Communicate the technical approach to mixed audiences, include clients
- Commitment to creating great experience across browser and devices
- Understanding/ experience with using front-end frameworks such as Bootstrap
- Input SEO standard practice to web development for example following H tag hierarchy order, image alt tags etc
- Responsive development experience
- Performance and interaction testing for all websites sent live to ensure the speed and user experience is as good as it can be
- Convert raw images and layouts from Invision into CSS/HTML themes.
- Collaborating on design with UX team
- Determine appropriate architecture, and other technical solutions, and make relevant recommendations to clients.
- Communicate to the Project Manager with efficiency and accuracy any progress and/or delays. Engage in outside-the-box thinking to provide high value-of-service to clients
